

Facilities at Singapore Changi Airport and London Heathrow

Increasing parts availability in Asia and EuMEA with two new partnerships.

Intertrade customers requiring international inventory – particularly in Asia, Europe, the Middle East and Africa – can now benefit from our growth in two regions. We are now serving customers with state-of-the-art facilities in Singapore Changi Airport and at London Heathrow Airport.

This expansion, established through a partnership with SDV, enables Intertrade to provide enhanced expertise, flexibility and scalability, tailored to specific customer requirements for aircraft inventory. The locations initially will stock Boeing 737 NG, Airbus A320 and ATR inventory, as well as other high-demand airframe, avionics, aircraft and engine parts from international teardowns.

An investment in unparalleled service

With our new Asia and EuMEA facilities, Intertrade can offer customers a broad range of service and shipping advantages in these regions. They include “next flight out” options with lower costs and longer shipping windows. The advanced facilities at Singapore Changi Airport and Heathrow locations mean lower lead times with increased on-time delivery and fill rates.

Our latest expansion will serve customers today and well into the future. With high efficiency, the facilities can process targeted inventory and meet your unique warehousing requirements. Count on Intertrade to meet your needs for aircraft components and engine parts.

In-region customers can now enjoy:

- Greater parts availability
- Lower lead times and shipping costs
- Higher on-time delivery and fill rates
- Longer same-day shipping windows

The Intertrade advantage

- \$80 million-plus inventory in stock and ready to ship
- 24-hour AOG services
- Global service and support
- Sales personnel and inventory in North America, Europe and Asia
- Access to Rockwell Collins solutions in 27 countries and more than 60 global locations
- AS9120/ISO 9001:2008 certified
